## AutoCAD Drafter / REVIT Modeler

Do you have solid AutoCAD skills, a general understanding of residential construction, and want to work for a growing As-Built company with a 2025 mission of opening offices across the country?

We are looking for full-time Architectural AutoCAD Drafters with an inevitable transition to Revit Modelers to strengthen our CAD/BIM Production Center in Salt Lake City! Are you ready to make your mark in an industry leading As-Built company?

### About You

**You love Architecture!** You may have 1 or more years of professional experience and/or a degree in the AEC industry, are fascinated with how homes are built and enjoy reverse engineering existing structures into design-ready plans. You might even have your dream home drafted/modeled already!

**You have a strong work ethic and an optimistic attitude.** Getting the job done right, on-time, and being proud of your work is your motivation! You expect to work hard, learn fast, and enjoy the ride!

**You've got an eye for detail.** You pay attention to the most minor details that most people would never notice. And you can easily mentally manipulate 2D and 3D figures/images allowing for quick photo-to-model navigation.

**You maintain composure while embracing change.** You understand that projects don't always go as planned and you're able to maintain composure – even with a high-volume workload – as you reset and manage project expectations.

**You're a problem solver.** When situations come up, you act quickly and focus on solutions instead of blame.

**You're a great communicator.** You can clearly and concisely articulate your thoughts through email, and you don't hesitate to make a phone call when you think a real conversation will yield a better result.

**You are tech-minded.** You are familiar with (or desire to work with) point clouds and are excited about AEC industry trending software/tech. You are Autodesk AutoCAD Certified. (Certifications are highly preferred.) Revit experience not required, but is a plus!

**You are a team player.** You enjoy working alone and sinking your teeth into a project, but you recognize that you can accomplish greater things when you are surrounded by like-minded people that share your goals.

### Things You Will Do

This is a full-time hourly (40 hour/week) position, with overtime opportunities. Your typical week will include the following:

- Review and prepare point clouds, including various support information, for drafting/modeling.
- Use AutoCAD to draft high quality As-Built products to PPM Standards.
- Plan-check drawings/models/files to ensure high quality and clear presentation of PPM As-Built plans for every project.
- Communicate with surveyors/project managers to ensure that scope and quality expectations are met or exceeded.
- Communicate with your drafting team as needed (verbally, via email, and in regular meetings) to deliver timely projects.
